Find the Text Evidence

Grade 4 | Reading comprehension | FR-008

Name: _____ Date: _____

Every Tuesday, the library opened half an hour early for the reading club. Mr Patel put a different mystery object on the table each week. This Tuesday it was a smooth, dark stone with tiny white marks. Lena thought it was from a beach, while Omar guessed it had come from a volcano. Mr Patel handed out magnifying glasses, but he did not tell them who was correct. Instead, he asked everyone to record two observations and one question. By the end of the session, Lena had changed her prediction. She wrote, 'I need more evidence before I decide.'

1. On which day did the reading club meet? Quote the evidence.

2. Describe the object using two details from the passage.

3. What did Lena first predict?

4. What did Omar predict?

5. What tool did Mr Patel give the club?

6. Did Mr Patel reveal the correct answer? Give evidence.

7. How many observations did each reader need to record?

8. What else did each reader need to write?

9. Which line shows that Lena became less certain?

10. Explain why an observation is different from a prediction.
